Applicant's or agent's file reference see form PCT/ISA/220				FOR FURTHER ACTION See paragraph 2 below			
International application No. PCT/EP2005/012029			International filing date (c 08.11.2005	Priority date (day/month/year) 09.11.2004			
International Patent Classification (IPC) or both national classification and IPC C08G8/28, B41C1/10, G03F7/00							
Applicant IPAGSA INDUSTRIAL, S.L.							
1.	This opinion contains indications relating to the following items:						
	⊠ Box No. I	Basis of the op	inion				
	☐ Box No. II	Priority					
	☐ Box No. III	Lack of unity o		ira to noveity, inventive	e step and industrial applicability		
	Box No. V	Reasoned state		.1(a)(i) with regard to its supporting such state	novelty, inventive step or industrial		
	☐ Box No. VI	Certain docum	·	5			
	☐ Box No. VII	Certain defects	in the international app	lication			
	☐ Box No. VIII	Certain observ	ations on the internation	al application			
2.	FURTHER ACTI	ON .					
	If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 <i>bis</i> (b) that written opinions of this International Searching Authority will not be so considered.						
	submit to the IPE	A a written reply date of mailing of	v together, where approx	oriate, with amendmen	PEA, the applicant is invited to its, before the expiration of three of 22 months from the priority date,		
	For further option	ns, see Form PC	CT/ISA/220.				
3.	For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2005/012029

_						
_	Box I	o. I Basis of the opinion				
1.	With the la	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.				
	This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).					
2.	With i	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
	a. type of material:					
		a sequence listing				
		table(s) related to the sequence listing				
	b. for	b. format of material:				
		in written format				
		in computer readable form				
c. time of filing/furnishing:						
		contained in the international application as filed.				
		filed together with the international application in computer readable form.				
		furnished subsequently to this Authority for the purposes of search.				
3.	h C	In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.				
4.	Additional comments:					

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1-11

No: Claims

Inventive step (IS)

Yes: Claims

1-11

No: Claims

Industrial applicability (IA)

Yes: Claims

1-11

No: Claims

2. Citations and explanations

see separate sheet

1. The closest prior art is disclosed in WO-A-0056791 (D1) cited in the application.

D1 discloses a near infrared absorption polymer comprising an infrared chromophoric group (e.g. a cyanine group) covalently bonded to the backbone of an alkali-soluble resin.

The claimed near infrared absorption polymer differs from this prior art in that the near infrared absorption polymer comprises at least two different infrared chromophoric group covalently bonded to the backbone of an alkali-soluble resin at least one of which is an indole cyanine dye and the other one is a benz[e]indole cyanine dye.

2. The object of the present invention is to solve the problem entailed by the prior art (discussed on pages 1-5) and to provide a near infrared absorption polymer allowing the formation of printing plates having a shorter post manufacturing conditioning time without having a reduced latitude in their performance.

These objects are achieved in accordance with the invention claimed in the independent claim 1 by providing near infrared absorption polymer comprises at least two different infrared chromophoric group covalently bonded to the backbone of an alkali-soluble resin at least one of which is an indole cyanine dye and the other one is a benz[e]indole cyanine dye, which is not suggested in either of the citations and is not rendered obvious by any combination of their teachings.

The claimed near infrared absorption polymer according to claim 1, the heat sensitive printing plate precursor according to claim 8, the process of manufacture of the printing plate precursor according to claim 10 and the method of producing a printing form according to claim 11 are therefore novel and involve an inventive step.
